Synopsis

I am a B-Tech Computer Science & Engineering graduate with over **2 years** of experience in **UST Global**, as a **Software Developer**. I aspire to join an organization that provides me with adequate challenges and opportunities to grow as a person while applying my knowledge, skills and innovativeness towards the fulfillment of the organizational goals.

Career Objective

To have a progressive approach and act as a catalyst for change and to continuously upgrade myself to be an asset for my company.

Skills

- Front End : HTML 5, CSS3, BOOTSTRAP, Javascript, JQuery.
- Database : Mysql.
- Programming Languages: COBOL, JCL, IMS, DB2, C++ and Python.
- Operating System: Windows 10.

Professional Summary

UST Global

Software Developer

March 2012 – Aug 2014

Project: - Inquiry Tracking is an application is a Customer Service Application that is internally used to document all calls, internet or correspondence received by WellPoint/Unicare. The application also contains an Auto Letter function that allows users to systematically produce letters for Subscribers and Providers. The Customer service representatives receive inquiries from customers as phone calls, emails, letters etc. This inquiry will be recorded in the online application with an inquiry number. The responses for these inquiries will be fetched from the system and depending upon the type of request, the requested information will be provided.

Responsibilities:-

- Involved in all stages of application life cycle like Analysis, Design, Coding and Testing to customize the application based on the specific requirement of the end client.
- Mainly focused on enhancing the existing code according to the customer needs.
- Wrote new code and enhance it with the existing codes.
- Perform testing.
